

RFC 6 Short Term Capacity Pilot

LEGEND:

- Principal route
- Diversionary route
- Connecting line
- Under construction
- Interconnection / Overlapping with other RFC

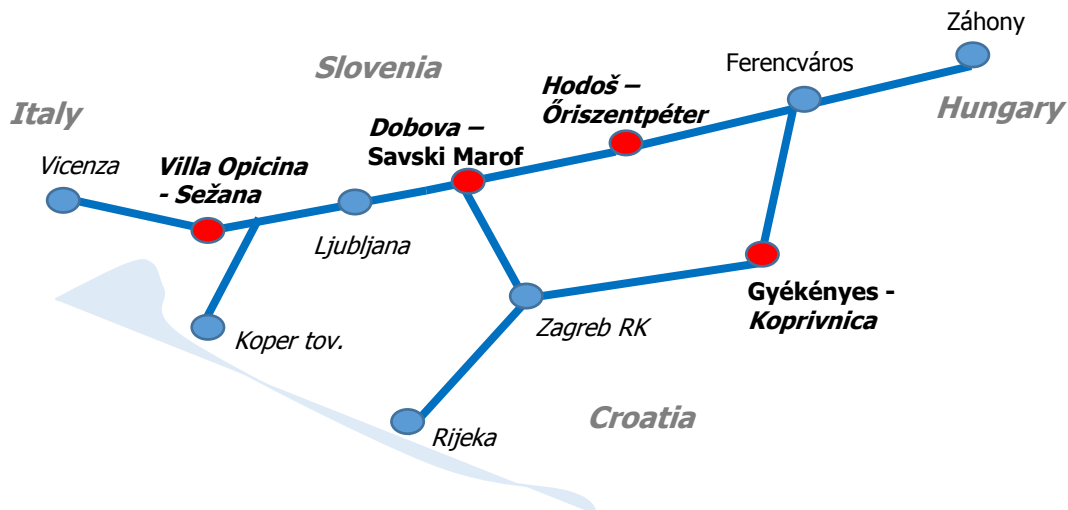

In order to answer to market needs, RFC6 offers a new Short Term Capacity Product in the frame of a pilot

Infrastructure Managers and Allocation Body taking part in this Pilot :

The product is available on the following routes of the Corridor :

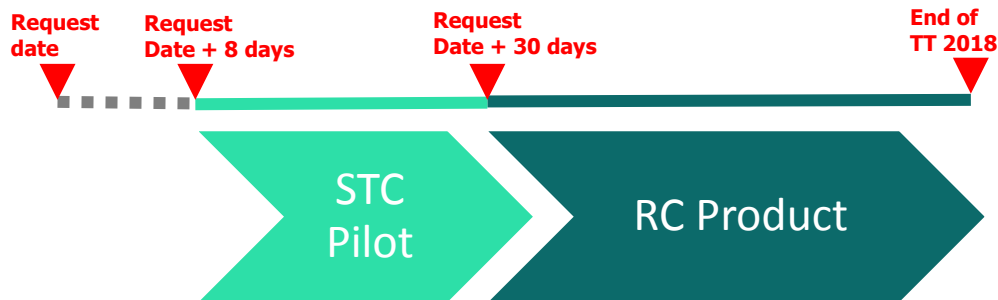

Pilot Timeline

- 10th December 2017, start of TT 2018 & start of the pilot
- The pilot will last for 6 Months 6 months

RC & STC Product : One set of offered capacity, 2 products

Same Offer

- Capacity is published in PCS in the form of a PaP (already harmonised capacity)
- When requesting the Capacity through PCS, RUs can add to the chosen PaP: Feeders, Outflows, Intermediate points.
- IMs will answer on those requests through PCS.
- C-OSS will supervise all requests.

[Click here to view TT 2018 RC & STC Offer from East to West](#)

New deadline!

- By booking 30 days in advance, the capacity is offered as Reserve Capacity
- If not requested, from 8 to 30 days before departure, the capacity will still be offered but as short term Product
- RC Product can be booked for the whole TT
- STC Product is dedicated to Spot traffic (few days)
- Answer is provided in PCS at least 10 days before the train runs for the RC
- The answer will be provided in PCS within 3 days should the request not include too long feeders and Outflows.

Short Term Product Process

Access to PCS <https://pcs-online.rne.eu/pcs/login>

And Further on, between 0 and 8 days?

To complete the offer of the RFC between 0 and 8 days, and especially work on border congestion issues :

The above Infrastructure Managers and Allocation Bodies (and their train Performance Teams) have agreed to display on the website of the Rail Freight Corridor a list of pre-harmonised paths which, even though not being guaranteed, are likely to be offered at very short time before departure.

In order to ensure possible harmonised slots on the 3 above networks and at very short term :

➤ Look at the following lists :

- [From West to East \(Vicenza - Villa Opicina- Sežana - Hodoš – Őriszentpéter / Koper - Hodoš – Őriszentpéter \)](#)
- [And From East-West \(Őriszentpéter - Hodoš – Sežana - Villa Opicina- Vicenza/ Őriszentpéter - Hodoš - Koper\)](#)

Among those, will also be listed the slots offered for STC pilot if still available

- Check their availabilities with the respective operational /dispatchers teams
- Request the capacity directly to the IM
